The new super thin line precision pencil with exclusive "floating lead protector"!
The reason you don't see our lead is the reason our lead won't break.
New from Sheaffer . . . pencils that use leads of just .3mm or .5mm for ultra precise writing and drawing without lead repointing. Yet these super thin leads don't break, even under heavy writing pressure. Our exclusive Floating Lead Protector absorbs all side-to-side pressure . . . assures a constant writing point. Convenient lead supply indicator signals *before* you run out of lead. Metal or plastic models. Just $2.98 to $5.98.
SHEAFFER®
Ultra-FINELINE®
.3mm Pencil
SHEAFFER WORLD-WIDE. A Textron COMPANY

INDEX
TO VOLUME LIV

February 1972
through January 1973

By Topic

Aero-Elastic Model Study of Wind-Induced Vibrations
Daryl W. Boggs — Feb. p. 5
The Boston, Revere Beach and Lynn
Allen Lakin — Oct. p. 5
Computer Aided Analysis of Electrocardiograms
Peter Kurnik — Dec. p. 7
Construction Criteria of Electrical Generating Facilities
Storm Kauffman — Apr. - May p. 14
Development of Artificial Hearts
David Lefkowitz — Mar. p. 7
A Note on Schools, Departments and Course Numbers at MIT
E. L. Bartlett and V. A. Fulmer — Oct. p. 12
Photo Fabrications as a Process for Production
K. G. Budinski and R. M. White — Nov. p. 5
The Railroads of Boston
Charles Bryant — Nov. p. 9
Seyfert Galaxies
Robert Hohfeld — Feb. p. 15
Superheavy Elements
Patrick Somerville — Apr. - May p. 6
Underground Tunneling
Andrew Celentano — Mar. p. 11
